
In MATERIALS AND METHODS, in the section Recording and stimulation, the author has made two corrections to units. The correct sentence is as follows:

“Next, muscles were exposed to an oxygenated “low”-metabolite mixture (15 mM lactate, 1 μM ATP, pH 7.0) and then to a “high”-metabolite mixture (50 mM lactate, 5 μM ATP, pH 6.6) delivered by a valve controller with an in-line heater to maintain solutions at bath temperature.”
