Vol. 12, p. 257, 1949. Last sentence under Methods beginning "The difference in latency . . ." should read "The distance between the points of stimulation divided by the difference in latency yields the speed of travel of the impulse in the most rapidly conducting fibers in the motor nerve trunk." Citation for Reference 12 on p. 266: Arch, Neurol. Psychiat., Chicago, 1948, 60: 340-365.
