SILLIMAN LECTURER 1954

The Editors of the Journal are proud of the fact that one of the original members of our Advisory Board, Professor Ragnar Granit, Director of the Medicinska Nobelinstitutet, Neurofysiologiska Avdelningen, Karolinska Institutet, Stockholm, is to give the Silliman Lectures at Yale University in 1954. He is choosing for his topic, Receptors and sensory perception. The Lectures will be given in April or May 1954, thus commemorating the fiftieth anniversary of Sherrington's Silliman Lectures, The integrative action of the nervous system, which were delivered in 1904, in April and May.
