Mechanisms of supraspinal actions upon spinal cord activities. Pharmacological studies on reticular inhibition of alpha extensor motoneurons. LLINAS, R. 1127

Postsynaptic inhibition of cerebellar Purkinje cells. ANDERSEN, P., J. C. ECCLES, AND P. E. VOORHOEVE 1138

Receptive fields of optic tract axons and lateral geniculate cells: peripheral extent and barbiturate sensitivity. MCILWAIN, J. T. 1154

Brain-stem neuronal response patterns to monaural and binaural tones. MOUSHEGAN, G., A. RUPERT, AND M. A. WHITCOMB 1174

A study of single cortical neurons during spreading depression. MORLOCK, N. L., K. MORI, AND A. A. WARD, JR. 1192

A new measurement of action currents developed by single nodes of Ranvier. TASAKI, I. 1199

CORRIGENDUM

Volume 27, September 1964

Page 786: Moshiro Nomoto, Nobuto Suga, and Yosuji Katsuki, "Discharge pattern and inhibition of primary auditory nerve fibers in the monkey." Second sentence in Section 3 under Summary should read: Those with more abrupt slopes are thought to consist of radial fibers, and those with more gradual slopes the spiral fibers.
