Volume 83, March 2000

Pages 1536–1549: Davidson MC and Marrocco RT, “Local Infusion of Scopolamine Into Lateral Intraparietal Cortex Alters Covert Orienting in Rhesus Monkeys” (http://jn.physiology.org/cgi/content/full/83/3/1536). In the METHODS section under Drug administration (on p. 1538), the second sentence misstates the volume of injected solution as 1 milliliter; the true volume was 1 microliter. The corrected text should read: “Scopolamine (Sigma Chemicals, St. Louis, MO) was dissolved in sterile Ringer solution, and 1.0 μl of the solution was infused into the intraparietal cortex during a session.”
