Volume 93, June 2005

Pages 3356-3369: Kaptein RG and Van Gisbergen JAM. “Nature of the Transition Between Two Modes of External Space Perception in Tilted Subjects” (doi:10.1152/jn.01137.2004; http://jn.physiology.org/cgi/content/full/93/6/3356). During production, some characters in Figs. 5 and 6 were misrepresented. These figures have been corrected and replaced in the online version of the final published article. Therefore the online version now deviates from the print journal with regard to these corrections.

Pages 3381-3389: Reis GF, Lee MB, Huang AS, and Parfitt KD. “Adenylate Cyclase-Mediated Forms of Neuronal Plasticity in Hippocampal Area CA1 Are Reduced With Aging” (doi:10.1152/jn.00827.2003; http://jn.physiology.org/cgi/content/full/93/6/3381). During production, the DOI number was misrepresented in this article. The DOI number has been corrected and replaced in the online version of the final published article. Therefore the online version now deviates from the print journal with regard to this correction.

Pages 3605-3614: Awater H, Burr D, Lappe M, Concetta Morrone M, and Goldberg ME. “Effect of Saccadic Adaptation on Localization of Visual Targets” (doi:10.1152/jn.01013.2003; http://jn.physiology.org/cgi/content/full/93/6/3605). During production, the DOI number was misrepresented in this article. The DOI number has been corrected and replaced in the online version of the final published article. Therefore the online version now deviates from the print journal with regard to this correction.

Volume 94, July 2005

Pages 255-264: Norrie BA, Nevett-Duchcherer JM, and Gorassini MA. “Reduced Functional Recovery by Delaying Motor Training After Spinal Cord Injury” (doi:10.1152/jn.00970.2004; http://jn.physiology.org/cgi/content/full/94/1/255). During production, the DOI number was misrepresented in this article. The DOI number has been corrected and replaced in the online version of the final published article. Therefore the online version now deviates from the print journal with regard to this correction.

Pages 531-549: Zhurov Y, Weiss KR, and Brezina V. “Tight or Loose Coupling Between Components of the Feeding Neuromusculature of Aplysia?” (doi:10.1152/jn.01338.2004; http://jn.physiology.org/cgi/content/full/94/1/531). During production, the DOI number was misrepresented in this article. The DOI number has been corrected and replaced in the online version of the final published article. Therefore the online version now deviates from the print journal with regard to this correction.
