Volume 94, December 2005

Pages 4121–4130: Kang N, Xu J, Xu Q, Nedergaard M, and Kang J. “Astrocytic Glutamate Release-Induced Transient Depolarization and Epileptiform Discharges in Hippocampal CA1 Pyramidal Neurons” (doi:10.1152/jn.00448.2005; http://jn.physiology.org/cgi/content/full/94/6/4121). N. Kang and J. Xu contributed equally to this article. A statement affirming this fact appeared in the first-published version at Articles in Press (http://jn.physiology.org/cgi/reprint/00448.2005v1); however, the statement was inadvertently left out of the final-published version.

Pages 4256–4268: Ekeberg O and Pearson K. “Computer Simulation of Stepping in the Hind Legs of the Cat: An Examination of Mechanisms Regulating the Stance-to-Swing Transition” (doi:10.1152/jn.00065.2005; http://jn.physiology.org/cgi/content/full/94/6/4256). During production, the link to the Supplemental Materials was misrepresented in this article. The link has been corrected and replaced in the online version of the final published article (http://jn.physiology.org/cgi/content/full/00065.2005/DC1). Therefore the online version now deviates from the print journal with regard to this correction.
