Attention Authors:

Important Information about the NIH Public Access Policy & Your Manuscript

Under the NIH Public Access Policy, NIH is asking its funded investigators to voluntarily submit to PubMed Central (PMC) the author’s final manuscript of articles resulting from research supported in whole or in part with direct costs from NIH. According to the NIH, this policy applies only to manuscripts accepted for publication on or after May 2, 2005.

If you choose to submit your accepted manuscript to PMC, you will be asked to indicate when that manuscript should be made available to the public. As copyright holder of your article, the APS has the sole right to publish or disseminate it. However, the APS grants you permission to allow public release of your manuscript through PMC 12 months after publication in the print version of an APS journal.

This period of time is consistent with our existing policy to make all content publicly available through HighWire Press 12 months after print publication. NIH will be able to determine when 12 months have elapsed because APS sends NIH electronic feeds of the article metadata upon publication in a journal issue. Therefore, you can submit your accepted manuscript to PMC at the time of acceptance to an APS journal, and will not have to calculate or track time elapsed from publication.

NIH intends to use the PMC database of manuscripts for portfolio management; to create a permanent archive of articles based upon NIH-funded research; and to give the public access to research publications. In announcing this policy, NIH officials underscored that it is voluntary and there will be no sanctions of any kind against authors who do not submit their manuscripts. **If you have any questions with respect to the NIH Public Access Policy and the publication of your article in an APS journal, please contact Margaret Reich at mreich@the-aps.org.**
The Journal of Neurophysiology has been a leading source of original research for neurophysiologists around the world. This respected journal, whose articles have an average cited half-life of over 7.5 years, is also a fundamental reference for any neurophysiologist.

The journal boasts approximately 750 articles per year, reporting on the function of the nervous system at all levels, from the membrane and cell to systems and behavior.

The journal presents new experimental approaches, including developmental neurobiology, neurochemistry, imaging and mapping techniques, and behavioral analysis.

Authors are required to submit papers online at www.apscentral.org.

A Few HOT Articles

The Size Principle: A Rule Describing the Recruitment of Motoneurons
Lorne M. Mendell

Plasticity in the Mediodorsal Thalamo-Prefrontal Cortical Transmission in Behaving Mice
Cyril Herry, Rose-Marie Vouimba, René Garcia
J. Neurophysiol. Nov 01, 1999; 82: 2827-2832

Dynamics of Receptive Field Size in Primary Visual Cortex
Brian J. Malone, Vikas R. Kumar, Dario L. Ringach

Predictive Reward Signal of Dopamine Neurons
Wolfram Schultz

Computational Motor Control: Redundancy and Invariance
Emmanuel Guigon, Pierre Baraduc, Michel Desmurget

Reader & Author Benefits

- Fully searchable text, including PubMed
- Rich color and sharp resolution of figures
- Editor’s Home Page at www.the-aps.org/publications/jn
- FREE access to the extensive collection of back issues available online 12 months after publication
- FREE e-mail notification of new content as it becomes available
- Manuscripts online within days of acceptance
- Perpetual/Electronic Archiving of the LOCKSS and CLOCKSS systems preserves the electronic content of all APS journals

Authors can choose to pay $2,000 on top of regular author fees and have their article made free immediately.
WE ARE
PHYSIOLOGISTS

The Federation of American Societies for Experimental Biology is a coalition of life science societies dedicated to enhancing the quality of life through research. If you are a member of The American Physiological Society you—like more than 85,000 other scientists—are a member of FASEB. FASEB strives to provide support in public affairs, distinguished publications, invaluable meetings and conferences, and a variety of member services.

FASEB—we are life scientists and we work for you. www.faseb.org
THE APS JOURNAL LEGACY CONTENT is an “online package” of over 100 years of historical scientific research from 13 American Physiological Society (APS) research journals.

- It can be purchased separately at a one-time charge for perpetual use. This Legacy Content is FREE to APS Members ($2,000 for nonmembers).
- It is a separate program from the Subscription Program in that you pay once for the perpetual access to the online content from all APS journals from 1898 to 1996-1998, depending on the journal (see chart below). This content goes back to the first issue of each of the APS journals—including the American Journal of Physiology, first published in 1898. This legacy content can be viewed as completely searchable scanned images of the printed pages.

PLEASE NOTE: All online content published after the end dates for the journals above is free to all 12 months after publication.
CALL FOR NOMINATIONS

for the Editorship of

Physiological Reviews

Nominations are invited for the Editorship of Physiological Reviews to succeed S. L. Hamilton, who will complete her term as Editor on December 31, 2008. The Publications Committee plans to interview candidates in the Spring of 2008.

Applications should be received before February 15, 2008.

Nominations, accompanied by a curriculum vitae, should be sent to the Chair of the Publications Committee:

Kim E. Barrett, Ph.D.
APS
9650 Rockville Pike
Bethesda, MD 20814-3991
Your Professional and Career Development

APS embraces a wide variety of disciplines devoted to human and animal health and function—including systems biology, genomics, translational research and all other life sciences.

Meet like-minded colleagues through the following distinctive groups:

- Serve on APS sections—and—APS committees
- Serve on special interest groups
- Organize an APS conference
- Serve on FASEB boards and committees
- Participate in APS education programs
- Participate in APS honors and awards programs

Your Access to the Scientific Community

- Discount registration rates for Experimental Biology
- Discount registration rates for APS Conferences
- Specialized listservs

Your Source for Information Services

- Free online access to current content and the legacy content of all 15 APS research journals (this legacy content is an online package of over 100 years of historical scientific research, and is normally $2,000 for nonmembers)
- Free essential color figures to APS members (Regular and Student) who are first or last authors of articles published in any APS journal
- Free print subscriptions to 3 of APS’s 15 research journals (Physiology, Advances in Physiology Education, and The Physiologist)—and over 50% discount on the other 12 APS print research journals
- 20% discount on subscription to Annual Reviews
- Up to 75% discount on APS scholarly books
- Over 30% discount on subscription to the AAAS Signal Transduction Knowledge Environment
The Department of Orthopaedic Surgery at the University of California, San Diego is seeking a highly qualified and energetic neuromuscular physiologist with strong interest in applications to orthopaedic surgery. The applicant should have a strong background in experimental neurophysiology in the context of movement and function. This is a new, tenure track position created to complement the Department’s highly regarded research program in muscle physiology and biomechanics. Appointment will be at the Assistant, Associate or Full Professor or In Residence Professor level, commensurate with qualifications and experience. Salary will be based on the UC pay scale. Candidates should possess a doctoral degree, have a strong record of academic research, including peer-reviewed publications. Applicants will be expected to secure extramural funding to support research, and should have demonstrated teaching excellence. It is highly desirable for the applicants to have demonstrated interest in and commitment to translational research. Responsibilities will include research and teaching at UCSD and the VA.

Filing deadline: 01/31/2008. Applications received by, or thereafter until position is filled, will receive thorough consideration. Send a detailed CV, copies of selected recent publications, and three letters of recommendation to:

Richard L. Lieber, Ph.D.
Professor and Vice-Chair
University of California, San Diego
Department of Orthopaedic Surgery
9500 Gilman Drive, M/C 9151
La Jolla, CA 92093-9151

**Recruiters: Don’t miss this important message!**

**TO:** Recruiters wanting to promote open positions, fellowship opportunities, programs, or conference announcements.

**TIME:** Now

**MESSAGE:** The publications of the American Physiological Society (APS) are a perfect way to advertise to research investigators, clinicians, educators, and information specialists in all disciplines of physiology. **And now the full issues of almost all the APS journals are made available online in a pdf format.** So your ad gets additional exposure online for free. Also, frequency discounts are given for running ads across the APS journals.

**NOTE:** Quarter, half, and full page ad sizes are available. Issues close the first of the month preceding the issue month.

**ACTION REQUESTED:** Email your ad to adnet@faseb.org for a quote.

Contact FASEB AdNet at 301-634-7791 for more info. View full media kit at www.faseb.org/adnet.
Track the Topics, Authors, and Articles important to you with...

What is CiteTrack?
CiteTrack is a free service that will alert you by e-mail whenever new articles matching a search criteria of your choice are published in an American Physiological Society (APS) journal or when a new article published in any of the participating journals in this program (which includes over 1,020 titles) cites an APS journal article of your interest. You can track the following:

- **Topics**...tell CiteTrack which words or subjects to watch for in new content.
- **Authors**...be alerted whenever key authors you are following publish a new paper.
- **Articles**...know whenever a paper of interest to you is referenced by another paper or letter.

Who Can Use CiteTrack Services?
CiteTrack services are provided free to individual subscribers of each APS print or online journal. If you are not a subscriber but you are interested in subscribing to this free service (or changing your current subscription), then all you need to do is provide us with your e-mail address. Once set up, CiteTrack will let you access for free the abstract of any article. If you want to see the full text of articles, you or your library will need an online subscription to that particular journal.

Sign up for CiteTrack Today...
Visit the individual APS journal websites (listed below), click on **Subscriptions**, and select **CiteTrack**.

E-mail alerts include citations and URLs for articles that match your criteria in each journal you are tracking.
